

The Airmiq slimline weather louvre offers a sleek, compact solution for air intake and exhaust where space or aesthetics demand a low-profile design. Engineered to protect against wind-driven rain and debris, it is ideal for use in external walls of residential, commercial, and plant room applications.

Manufactured from anodised aluminium and fitted with galvanised bird mesh to rear face.

- Low-profile design for tight spaces and discreet installations
- Effective weather protection with horizontal blade design
- Made from corrosion-resistant aluminium
- Silver anodised finish
- Suitable for intake or exhaust applications
