

Airmiq duct clamps are a secure and easy-to-install solution for suspending circular ductwork in residential, commercial, and industrial ventilation systems. Each clamp includes a welded M10 boss for threaded rod or hanger bolt installation, ensuring a strong and reliable connection.

Available in both rubber-lined and non-lined versions, these clamps suit a variety of applications - from general-purpose duct fixing to noise-sensitive environments where vibration isolation is important.

- Heavy-duty steel construction with M10 boss
- Rubber-lined option provides acoustic and vibration damping
- Unlined option ideal for standard duct installations
- Corrosion-resistant zinc-plated finish
- Compatible with all standard duct sizes
- Quick to install and adjust

SKU	Size	Type
